Empowering Syrian Undergraduates to Join MicroMasters Programs (SYMPRO): Toward Career-Focused and Affordable Graduate Studies (Short project)

THIS PROJECT IS IMPLEMENTED UNDER THE GRANT SCHEME OF HOPES

HIGHER AND FURTHER EDUCATION OPPORTUNITIES & PERSPECTIVES FOR SYRIANS

YARMOUK UNIVERSITY

FUNDED BY THE EUROPEAN UNION

EU REGIONAL TRUST FUND 'MADAD'

الصندوق الاستئماني الأوروبي 'مدد'

Outline

- Challenges of higher Education for vulnerable groups
- MicroMasters Programs
- Project Phases
 - **Needs analysis** and participants selection
 - **Phase 1:** Local empowerment/ conducted at Yarmouk University
 - **Phase 2:** MOOCs-Based empowerment/ taking a real MicroMasters courses
- Challenges in the project Implementation

THIS PROJECT IS IMPLEMENTED UNDER THE GRANT SCHEME OF HOPES

HIGHER AND FURTHER EDUCATION OPPORTUNITIES & PERSPECTIVES FOR SYRIANS

Higher Education Challenges

- Joining Post-graduate (Master Level) Programs
- Students need advanced skills to get scholarships program. Especially, for post-graduate courses
- Example Requirement
- ***“We will identify a highly talented and qualified cohort to participate in a special certificate program.*”**
- ***“Applicants will be tested in both maths and English language skills prior to being accepted to the program”***

MicroMasters Programs

- A series of online graduate level courses from top universities designed to advance career.
- **MicroMasters** credentials bridge the gap between education and the workplace.
- Students may apply to the university offering credit for the **MicroMasters certificate**
- If accepted, can pursue an accelerated and less expensive Master's Degree.
- Once you've successfully earned a **MicroMasters** credentials(**i.e. 50-60% of a master credits**), you can apply to an on-campus program that recognizes the **MicroMasters** credits.
- If you're accepted, the digital credential counts as credit toward a portion of the degree, resulting in an accelerated and much more cheaper program.

Course Lecturers

Your Instructors:

Dr Johannes U. Herrmann

Hannes is a Senior Lecturer who teaches computing at Curtin University. He has worked at both the Sawarak and Bentley campuses of Curtin, as well as having worked for UWA, Murdoch and ECU in the past. He received his B.Sci (Hons) and MSc (Research) from UWA and his Ph.D. from Curtin. He is involved in several ongoing projects relating to the teaching of computing-related information using technology.

Dr Valerie Maxville

Valerie Maxville is an experienced educator who is passionate about technology and its potential. She enjoys making technology accessible - taking on the challenge of communicating complex concepts to diverse audiences.

Valerie lectures core units in Data Science and Computer Science at Curtin University. From 2007 to 2016 Valerie coordinated and delivered training, internships, outreach and user engagement at the Pawsey Supercomputing Centre (IVEC) to increase awareness and uptake of computational science. Valerie holds a PhD in Computer Science (Software Engineering) and an Honours degree in Computer Science. As an industry volunteer, Valerie actively promotes careers in computing and local industry development. She is a Fellow of the Australian Computer Society (ACS) and a Senior Member of the Institute for Electrical and Electronic Engineers (IEEE).

Dr Aloke Phatak

Aloke is an engineer-turned applied statistician who obtained his BASc, MASc, and PhD from the University of Waterloo in Canada. He spent more than 20 years at the CSIRO, where he carried out research in applied statistics; worked with a wide range of industries and in diverse areas such as industrial statistics, biomarker discovery, and climate extremes; and developed short courses for practicing engineers and scientists.

At Curtin he co-ordinates the Data Science Major, carries out consulting with industry, and is always on the lookout for new ways of teaching statistics and data science.

ACTIVITY: Programming in Tinkercad®

Now you will do two guided activities in Tinkercad®.

We strongly encourage you to work through both activities, as it will help you to complete your assessments for this course.

Tinkercad® is a web based application for making 3D designs and electronic circuits.

If you are already familiar with Tinkercad® from previous IoT courses, please download and follow the instructions below.

Activity 1

This activity introduces you to programming a microcontroller using code blocks to switch on an LED in response to pushing a button.

- [IoT4x Module1 Activity 1](#)

Activity 2

This activity will instruct you in an example of using code blocks for more complex programming by reading from an input, storing the reading in a variable, and then adjusting that value before using it to control a device at the output.

- [IoT4x Module1 Activity2](#)

Question 5 - Information

The whitepaper "[Intel® IoT Gateways: Pulling Data from a Temperature Sensor Using a Python Script](#)" is a getting started guide for working with Gateways and Python.

The code includes statements to delay the processing to reduce data traffic and storage. Study the following code and answer the question that follows.

```
1  #! /usr/bin/python
2  import sys
3  import datetime
4  from time import time, sleep
5  from Phidgets . Devices . InterfaceKit import *
6  from Phidgets . Devices . TemperatureSensor import *
7  TEMP_SENSOR_PORT = 6
8  # Define an error catching function so we can call it on "try...except" blocks
9  def LocalErrorCatcher( event ):
10     print ( "Phidget Exception: " + str(e.code) + " - " + str(e.details) + ",
11           Exiting..." )
12     exit(1)
13  # Get the temperature sensor reading from port #TEMP_SENSOR_PORT of the Sensor Kit
14  def GetTemp( device , outfile , TEMP_SENSOR_PORT ):
15     current_time = datetime . datetime . now()
16     # Get the board temperature in Celsius by reading sensor input and applying
17     conversion formula
18     ambientTemp = ( device .getSensorValue( TEMP_SENSOR_PORT ) * .2222) - 61.111
19     # Write the data to the text file
20     time_and_temp = (str(current_time) + " , " + str(ambientTemp) + "\n" )
21     print ( "%s" % time_and_temp)
22     outfile .write(time_and_temp)
23     sys .stdout.flush()
24     # Clear and open the data file for writing
25     outfile = open( "phidgets_temperature_data.txt" , "w" )
26     # Write a header to the text file first thing
27     outfile.write( "Time Sensor Temperature (C)\n" )
```

Question 5

2.0/2.0 points (graded)

What change would be made to the code to sample the data every minute instead of every second?

- ☐ Line 7, change TEMP_SENSOR_PORT = 6 to TEMP_SENSOR_PORT = 60
- ☐ Line 39, change device.waitForAttach(10000) to device.waitForAttach(600000)
- ☐ Line 40, change device.setDataRate(TEMP_SENSOR_PORT, 4) to device.setDataRate(TEMP_SENSOR_PORT, 60)
- ☒ Line 49, change sleep(1) to sleep(60) ✓

Course 2 on Cyber Security

- A MicroMasters Program on Cyber Security
- Offered by RIT (Rochester Institute of Technology)

Courses

Cybersecurity Fundamentals

Learn cybersecurity fundamentals, including how to detect threats, protect systems and networks, and anticipate potential cyber attacks.

[View the Cybersecurity Fundamentals course](#)

Starts on January 8, 2019

Computer Forensics

Learn the process, techniques and tools for performing a digital forensics investigation to obtain data related to computer crimes.

[View the Computer Forensics course](#)

Starts on October 9, 2018

Cybersecurity Risk Management

Learn key principles of risk analysis, risk assessment and risk mitigation for information security using both qualitative and quantitative methodologies.

[View the Cybersecurity Risk Management course](#)

Starts on October 9, 2018 ([more dates](#))

Network Security

Learn the process of network security, including intrusion detection, evidence collection, network auditing, and contingency planning against attacks.

[View the Network Security course](#)

Starts on October 9, 2018

Cybersecurity Capstone

Demonstrate the knowledge and skills acquired in the Cybersecurity MicroMasters Program.

Starts on January 8, 2019 ([more dates](#))

Cyber Security MicroMasters Program

View Courses

Meet the Instructors

The MicroMasters Program

MicroMasters® A series of credit-eligible courses recognized by industry.

Gain the essential knowledge and expertise in network security and forensics needed for cybersecurity in enterprise environments.

In this Cybersecurity MicroMasters Program, you will learn:

- Fundamentals of networks;
- Systems administration;
- How to protect computer networks and other systems by mitigating vulnerabilities and monitoring intrusions;
- How to perform digital forensic analysis of cybercrime by gathering information on the nature and extent of the attack for presentation in a court of law, as well as assessing the extent of the damage to an organization;
- Techniques of risk analysis;
- Risk assessment and vulnerability assessment.

The MicroMasters Program capstone experience for verified learners entails practical demonstration of these skills.

⌚ Average Length:	8 weeks per course
🕒 Effort:	10-12 hours per week, per course

PACKET SNIFFING UNIT QUIZ

The result of this graded quiz is part of your final grade. **You are only allowed one attempt per question.**

This quiz is open to all students. Students who are seeking a verified certificate *must* achieve a final course grade average of at least 80%.

If you have a question about any of the quiz questions, **do not post about it in a discussion.** Please contact the Course Team directly by email. Please include the content of the question you are asking about in your email.

Unit 1 Question

1/1 point (graded)

When an encrypted SSL/TLS segment is sent, can a packet sniffer still read the source and destination IP addresses of the packet?

☒ Always ✓

☐ Never

☐ Only if the private key is installed

☐ Only if the public key is installed

Weekly Activities

Activity: Viewing Network Data with Wireshark

[Bookmark this page](#)

**ACTIVITY: VIEWING NETWORK DATA WITH WIRESHARK**

This activity is ungraded.

Remember: Be sure to watch these Demo videos from this unit before trying this activity. Watching me do it first will help you understand each of the steps.

- Welcome to Wireshark
- Local Communication through Wireshark
- Remote Communication through Wireshark

System: You can complete this activity on any system. You should have at least 6GB of RAM.

Time: This activity should take you 30 to 60 minutes to complete.

Downloads

- Download and install Wireshark
- Download and install VirtualBox
- Download Kali Linux

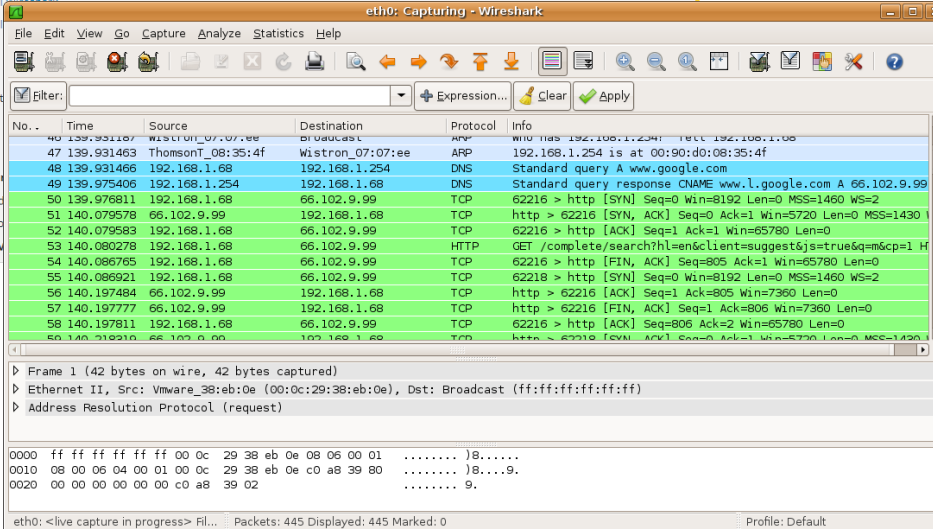

Goal

To learn how to find and interpret network data captured with Wireshark.

Instructions

Set up your virtual machine

1. Launch VMWare Workstation
2. Enter a valid email address
3. Click the Finish button
4. Click Create a New Virtual Machine

eth0: Capturing - Wireshark

السلام عليكم

ارجو العلم بأن محتوى الوحدة الأولى متوفر على موقع edx كما ارجو منكم الدخول الى الموقع ومن ثم الى المساق

<https://courses.edx.org/courses/course-v1:RITx+CYBER501x+2T2018/course/>

وعمل التالي

1. التعريف بانفسكم باللغة الانجليزية

My name is ... and I am interested in Cyber Security

التعريف اعلاه عام وتستطيعون التعريف بانفسكم بطريقة اخرى ..حتى اللحظة فقط 3 طلاب قاموا بالتعريف بانفسهم داخل المساق

2. هناك مجموعته من الفيديوهات لتشرح الوحدة الأولى "مقدمه الى الامن السيبراني " .وتحتوي الفيديوهات الكثير من الامثلة الواقعيه لعمليات اختراق حدثت على مستوى العالم

3. النص الموجود مع كل فيديو مرفق في هذا الإيميل بملف اسمه "محتوى الوحدة الاولى"، بالتالي لكم خيار الاطلاع على الفيديو او الاطلاع على النص في ملف "محتوى الوحدة الاولى"

4. بعد نهاية فيديو الوحدة الاولى هناك مجموعته من القراءات الذاتيه اغلبها مواقع الكترونيه تتحدث عن موضوع الاختراق. مثال يشرح المدرس كيفية التجسس على كاميرات لاتحتوي نظام حماية من الاختراق ..ويعطي مثال حي على احد هذه المواقع كالتالي

Challenges

- Running the project with small budget (8000 Euros). 25% of them are overhead cost
- Students can only take a course once
- The cost of an entire MicroMasters Programs is 1500-2000 USD per student. Not that expensive!!
- It is given our small budget
- Time of offering courses is not always convenient for every student
